## Description

Millinox MXSKILTD door plate in stainless steel for Ladies toilet room.  
Satin finish.

## Installation

Fitted to door/wall by double sided adhesive tape.

# Installation MXSKILT

## MAINTENANCE: INTRA PRODUCTS OF STAINLESS STEEL

Several of our products are delivered entirely or partly covered with plastic wrapping. This wrapping protects the products during transport. This wrapping must be removed before using the products.

In order for your Intra stainless steel product AISI304 to retain its original quality and appearance we recommend regular cleaning. Use mild soap or cleaning products specifically designed for stainless steel and clean water. Then wipe the surface with a dry cloth.

Never use detergents containing chlorine, iodine, fluoride or abrasives on stainless steel. Also avoid contact with acid solutions and other substances incompatible with stainless steel. Remember that food and skin care products may contain such substances, e.g. ketchup, juice, salt, certain cleansers, nail polish, etc. Promptly remove spills of such products.

Observe the following:

- \* Do not allow water or other liquid to dry in. This is to avoid staining the surface.
- \* Even though stainless steel can withstand harsh treatment, it can easily be scratched by sharp objects. For products with normal, polished (brushed) finish, this will be very visible when the product is new, but after a period of use, this will be negated as the steel loses its lustre. For products with satin and polished finishes, the scratches will always be visible. Never use scouring powder or steel wool on stainless steel. In addition to scratching the steel, wire wool will leave behind small particles that may develop into rust spots which, over time, may corrode the steel.
- \* Stainless steel must not come into contact with, or be in environments containing, chlorine solutions for long periods of time.
- \* Silver polish causes stains which cannot be removed.
