

Icon ICA3H

Art. no. ICA3H
GTIN 7393069021516

Overall dimension in mm 300 x 200 x 450
Volume in L 27
Material AISI 304
Material thickness in mm 1,25/1,00
Installation height in mm 600
Gross weight in kg 7.90
Weight, pallet 262.00
Pcs per pallet 30
Design OddThorsen
Made in Norway

Description

Icon Waste bin in stainless steel, with lid. For sanitary towels. Supplied with waste bucket in plastic. Grinded finish.

Installation

Fix the product to the wall by using the four screws supplied with the product. Standard procedure is to use the back plate as drill template.

Installation ICA3H

ASSEMBLY:

Included in the box:

- * Waste bin
- * Assembly equipment
- * Key

Ensure that you have all the parts before assembly begins.

Fix the product to the wall by using the four screws supplied with the product. Standard procedure is to use the back plate as drill template.

For attachment of bag:

Unlock the container

Raise the hoop and put the bag around the hoop on all sides, and bend the hoop back down. When the front closes the bag will be pinched between the hoop and the container, and it will remain in place.

SPARE PARTS:

Lock for dispenser: 91110

MAINTENANCE:

Several of our products are delivered entirely or partly covered with plastic wrapping. This wrapping protects the products during transport. This wrapping

must be removed before using the products.

In order for the product to retain its original quality and appearance, regular cleaning is recommended. Use mild soap or products specifically designed for stainless steel and clean water. Then wipe the surface with a dry cloth. Never use detergents containing chlorine, iodine, fluoride or abrasives. Also avoid contact with acidic solutions and other substances incompatible with stainless steel. Remember that food stuffs and skin care products may contain such substances; e.g. ketchup, juice, salt, some cleansers, nail polish, etc. Promptly remove spills of such products.

* Do not allow water or other liquid to dry in. This is to avoid staining the surface.

* Even though stainless steel can withstand harsh treatment, it will easily be scratched by sharp objects. For products with polished (brushed) finishes, this will be very visible when the product is new, but after a period of use, this will be negated as the steel loses its lustre. On surfaces with satin and polished finishes, the scratches will always be visible. Never use scouring powder or steel wool on stainless steel. This will scratch the steel and steel wool will leave small particles that can develop into rust spots.

* Stainless steel must not come into contact with, or be in environments containing, chlorine solutions for long periods of time.

* Silver polish causes stains which cannot be removed.
