

Bowl SK7030inset

Art. no. SK7030NEDF
GTIN 7393069022834

Description

Commercial bowl SK7030 for inset. Supplied with 3 1/2" basket waste and overflow.

Overall dimension in mm	732 x 532 x 300
Depth in mm	300
Bowl dim. in mm	700 x 500 x 300
Cut-out dimension, inset model	712 x 512, R20
Radius	20
Waste hole dim. in mm	Ø97
Material	AISI 304
Material thickness in mm	1,25
Net weight in kg	10.43
Pcs per pallet	10

Installation

Cut a hole in the table top according to the cut-out dimensions. Add silicone on the flanges and place the bowl into the hole.

Installation SK7030inset

Mounting:

Included in the box:

- * sink
- * 3 1/2" basket waste with overflow
- * Installation instruction

Mark out the cut-out dimensions on the work top and remember to calculate any space for placement of mixer tap in the worktop between the sink and the

wall. Cut the hole in the table top according to the installation instructions. Add silicone on the flanges and place the bowl in the table top.

Spare parts:

3 1/2" basket waste w/overflow: 780640

Maintenance SK7030inset

MAINTENANCE: INTRA PRODUCTS OF STAINLESS STEEL

Several of our products are delivered entirely or partly covered with plastic wrapping. This wrapping protects the products during transport. This wrapping must be removed before using the products.

In order for your Intra stainless steel product AISI304 to retain its original quality and appearance we recommend regular cleaning. Use mild soap or cleaning products specifically designed for stainless steel and clean water. Then wipe the surface with a dry cloth. Never use detergents containing chlorine, iodine, fluoride or abrasives on stainless steel. Also avoid contact with acid solutions and other substances incompatible with stainless steel. Remember that food and skin care products may contain such substances, e.g. ketchup, juice, salt, certain cleansers, nail polish, etc. Promptly remove spills of such products.

Observe the following:

- * Do not allow water or other liquid to dry in. This is to avoid staining the surface.
- * Even though stainless steel can withstand harsh treatment, it can easily be scratched by sharp objects. For products with normal, polished (brushed) finish, this will be very visible when the product is new, but after a period of use, this will be negated as the steel loses its lustre. For products with satin and polished finishes, the scratches will always be visible. Never use scouring powder or steel wool on stainless steel. In addition to scratching the steel, wire wool will leave behind small particles that may develop into rust spots which, over time, may corrode the steel.
- * Stainless steel must not come into contact with, or be in environments containing, chlorine solutions for long periods of time.
- * Silver polish causes stains which cannot be removed.
