Bowl SK5020inset

Art. no. SK5020NEDF
GTIN 7055570001516

Overall dimension in mm	560 x 460 x 200
Depth in mm	200
Bowl dim. in mm	500 x 400 x 200
Cut-out dimension, inset model	520 x 420, R80
Radius	80
Waste hole dim. in mm	Ø52
Material	AISI 304
Material thickness in mm	0,9
Gross weight in kg	4.10
Pcs per pallet	24

Description
Commercial bowl SK5020 for inset. Supplied with fastening clips and 1 1/2" waste with plug and overflow.

Installation
Cut a hole in the table top according to the 1:1 cut-out template. Put the bowl into the hole and fasten it to the table top with the enclosed screws through the fastening clips.

CE

Installation SK5020inset

Mounting:

Included in the box:
* sink
* Fastening clips 4 pcs
* Waste 1 1/2" with overflow
* Cut out template

Place the cut out template on the work top and remember to calculate any space for placement of mixer tap in the worktop between the sink and the wall. Cut the hole in the table top according to the 1:1 template. Place the bowl in the table top and tighten the mounting screws that are placed in the clips along the outside of the bowl.

Spare parts:

Waste 1 1/2" w/overflow: 79001
Fastening clips (4 pcs): 1926001
Cut out template: 76182-1

MAINTENANCE:
INTRA PRODUCTS OF STAINLESS STEEL

Several of our products are delivered entirely or partly covered with plastic wrapping. This wrapping protects the products during transport. This wrapping must be removed before using the products.

In order for your Intra stainless steel product AISI304 to retain its original quality and appearance we recommend regular cleaning. Use mild soap or cleaning products specifically designed for stainless steel and clean water. Then wipe the surface with a dry cloth. Never use detergents containing chlorine, iodine, fluoride or abrasives on stainless steel. Also avoid contact with acid solutions and other substances incompatible with stainless steel. Remember that food and skin care products may contain such substances, e.g. ketchup, juice, salt, certain cleansers, nail polish, etc. Promptly remove spills of such products.

Observe the following:
* Do not allow water or other liquid to dry in. This is to avoid staining the surface.
* Even though stainless steel can withstand harsh treatment, it can easily be scratched by sharp objects. For products with normal, polished (brushed) finish, this will be very visible when the product is new, but after a period of use, this will be negated as the steel loses its lustre. For products with satin and polished finishes, the scratches will always be visible. Never use scouring powder or steel wool on stainless steel. In addition to scratching the steel, wire wool will leave behind small particles that may develop into rust spots which, over time, may corrode the steel.
* Stainless steel must not come into contact with, or be in environments containing, chlorine solutions for long periods of time.
* Silver polish causes stains which cannot be removed.
